Your smile is important. It's one of the first things you notice when you meet someone. A whiter, brighter smile is beautiful - it can help you feel better about yourself and make a memorable impression.

Your lifestyle and the aging process can stain and darken your teeth. Many things we do on a regular basis can contribute to stained teeth, such as drinking coffee, tea, cola and red wine or smoking.

Whitening can get your smile looking its best. You should look for a whitening procedure that is:

- ✓ Fast and convenient
- ✓ Long lasting
- ✓ Low sensitivity
- ✓ Proven to be safe and effective
- ✓ Performed by a Dental Professional

Take a first step in feeling good and looking great with brighter, whiter teeth in less than an hour. Zoom! is safe, effective and very fast, and performed only by a dental professional.

The procedure is simple. It begins with a short preparation to cover your lips and gums, leaving only your teeth exposed. The Zoom! Dentist then applies the proprietary Zoom! Whitening gel (containing hydrogen peroxide), which was designed to be used specifically with the Zoom! Light. The light and gel work together to gently penetrate your teeth, breaking up the stains and discolorations. During this time you can relax and listen to music. The gel is applied for 3 fifteen minute sessions for a total treatment time of 45 minutes. Finally, you go home with your brighter, whiter smile.

FREQUENTLY ASKED QUESTIONS:

1.) How long do the results last?

By following some simple post whitening care instructions, your teeth will always be lighter than they were before. To keep your teeth looking their best, we recommend

flossing, brushing twice daily and occasional touch-ups with Zoom! gel. These are professional formula products designed specifically to keep your teeth their brightest.

2.) Are there any side effects?

Sensitivity during the treatment may occur with some patients. The Zoom! light generates minimal heat which is the usual source of discomfort. On rare occasions, minor tingling sensations are experienced immediately after the procedure, but always dissipate. You can also ask your dentist to supply you with anti-sensitivity toothpaste for use prior to treatment.

3.) What causes tooth discoloration?

There are many causes. The most common include aging and consumption of staining substances such as coffee, tea, colas, tobacco, red wine, etc. During tooth formation, consumption of tetracycline, certain antibiotics or excessive fluoride may also cause tooth discoloration.

4.) Do many people whiten their teeth?

More people than you might imagine. A bright sparkling smile can make a big difference for everyone. The Zoom! Chairside Whitening System makes it easier and faster than ever before.

5.) Who may benefit from tooth whitening?

Almost anyone. However, treatment may not be as effective for some as it is for others. Your dental professional can determine if you are a viable candidate for this procedure through a thorough oral exam, including a shade assessment.

6.) Is whitening safe?

Yes. Extensive research and clinical studies indicate that whitening teeth under the supervision of a dentist is safe. In fact, many dentists consider whitening the safest cosmetic dental procedure available. As with any tooth whitening product, Zoom! is not recommended for children under 13 years of age and pregnant or lactating women.

Other whitening systems don't compare to the **Zoom!** Chairside Whitening System. Nothing whitens better or faster.

How **ZOOM!** Compares to other Whitening Options

	Treatment of Time	Results	Notes
Zoom! Chairside	45 Minutes	Avg. 8 shades	<ul style="list-style-type: none"> ✓ Immediate Results ✓ Long lasting, ✓ Less fadeback ✓ Safe & comfortable ✓ Performed by a Dental Professional
At Home Trays	7-14 Days	6 shades	<ul style="list-style-type: none"> ✓ Self applied ✓ Trays ✓ No immediate results
Whitening Strips/Paint on Gel	7-30 Days	3-4 shades	<ul style="list-style-type: none"> ✓ Inconsistent tooth whitening ✓ No immediate results
ToothPaste	1 month +	1-2 shades	<ul style="list-style-type: none"> ✓ Results fade if you stop using the toothpaste ✓ Superficial stains only
